

LE GRAND HOME CINÉMA NOUVELLE GÉNÉRATION

Whether you like TV programs, movies on Blu-Ray, music or video games, the GRAND HOME CINEMA meets all your expectations. This real all-in-one ready-to-use furniture with original design can easily be installed anywhere in your interior, against a wall or center of room. Three wires connected to the wall or the ground discreetly find their way into the furniture from the rear side (power supply, TV antenna, Internet). The exhaustive collection of decoration allows a customization according to your request.

THE APPLICATIONS

The fully integrated GRAND HOME CINEMA offers immediate installation for individuals, hotels, companies and large yachts. Controlling external functions to the GRAND HOME CINEMA furniture is now possible from the single remote or the iPad. In this context, CHEVRIER TECHNOLOGIES manages your additional installation project such as lighting control, motorized shades or even climate control. The composition of the internal multimedia equipment can be customized for businesses according to their desired use. The domotic control function is provided by a RTI equipment which can optionnally be replaced by similar products from the CRESTRON or AMX brands as well. CHEVRIER TECHNOLOGIES can upon request deliver a case ready for integration in a customer-specific furniture while preserving the benefits of the automatism and the simple connections.

THE PRODUCT LINE

Product is available in three furniture arrangements with different TV screen sizes. All include TV set, disc player (Blu-Ray 3D, DVD, CD, et al.), FM or Internet radios, iPod/iPhone/iPad audio play, Internet connection.
